Working Principle

1. Biological Hyperthermia Technology

Utilize bio-thermal effect, through the warm probe, active the internal water molecules, make the tissue cells at a high resonance energy level, activate prostate glands

2. Targeted medicine Delivery Technology

Bionic designed tiny probe fit body structure perfectly, sent medicine to the prostate and reach lesions directly

3. High-frequency Vibration Technology

High-frequency vibration stimulates the sympathetic nerve, accelerates blood circulation and dredges the glands vessel. Promote the medicine penetrate into the prostate glands and eliminate the inflammatory substance

4. MF(Medium Frequency) Massage Technology

Soothing MF massage makes medicine ions infiltrate evenly, eliminate inflammation thoroughly. Meanwhile, induce secretion of physical endorphins, relieve pain and bring pleasure
